WORK EXPERIENCE

Boeing Company
Software Engineer

Nov 2021 – Present
Seattle, WA

- Supported supplier coordination and software certification by following certification liaison objectives in Boeing and Software airborne standards within DO-178B and DO-178C
- Reviewed software development life cycle data from the entire process including planning, design, development, verification and validation for quality, technical soundness and certification compliance to FAA
- Collaborated with system teams to review 100s of requirements from supplier requirements to high-level to low-level, and ensure that all requirements are being 100% covered with requirement based testing
- Led the effort to categorize and prioritize 50+ open issue items, achieving a systematic resolution process that improved software performance; presented actionable metrics in system-level meetings that drove strategic decisions.
- Created JIRA dashboard to provide high level visibility of team’s current and future project to aid in risk mitigation

Puget Sound Energy
System Protection Intern

Jun 2020 – Sep 2020
Seattle, WA

- Modeled electrical systems to upgrade smart breakers and relays in order to coordinate with other equipment in the system and reduce customer impact in an outage.
- Communicated with 10 cross-functional teams to organize the distribution automation process separating it into 5 phases and flow chart from pre-scoping to maintenance

Girls Make Games
Game Developer Fellow

Jun 2019 - Jul 2019
Seattle, WA

- Collaborated with a group of 4 to organize a camp to mentor 25 girls from the age of 8 -17 in the process of video game development using Stencyl

Projects

Project Spot Check | Panthera

- Automated the identification of unique spotted cats by using algorithms Mask R-CNN and SIFT keypoints to analyze large datasets containing over 2000 images and reduce overall runtime by over 50%

Youtube Clone | Personal Project

- Full stack Youtube clone using tech: TypeScript, Next.js, Docker, Firebase, and Google Cloud Platform

EDUCATION

Seattle University
Bachelor of Science, Computer Engineering

June 2021
Seattle, WA

- **GPA: 3.5/4.0**
- President of Vietnamese Student Association and board member of Northwest Vietnamese Student Association
